Small. Lightweight.  
Wearable. Wireless.

Carefully designed for various environments, the Frontline Communicator is a hands-free audio and video communication solution that offers unparalleled mobility. The Frontline Communicator also allows you to film and store video images for future use.

The Frontline Communicator is based on technological integration and complex miniaturization process. This unique and innovative IP communication system is ideal for remote support, remote collaboration and distance training application

### Headset camera

Designed to leave its user completely hands-free, the Frontline Communicator headset is equipped with a miniature video camera, integrated pointer device, directional microphone for noise reduction and a high-quality headphone for optimal sound reception.

### Battery charger

Created specifically for the Frontline Communicator, the battery charger will rapidly recharge the system's batteries. Hot swappable for up to two hours of operation.

### Rugged Carbon Fiber Cover (optional)

The Frontline Communicator EX is equipped with a rugged carbon fiber cover for improved impact sustainability in extreme field use. (sold separately)

### AFX-40 Handheld camera

With its integrated LED light, adjustable focus and pointer, the Frontline Communicator's camera is easy to handle. Ideal for video close-ups, zoom, snapshots with its 40x zoom autofocus for hard to reach places.

### Transmission module

The Frontline Communicator's transmission module houses a powerful computer and a state-of-the-art codec. Powered by a rechargeable Li-ion battery, the transmission module is equipped with a PCMCIA card reader, WIFI, 802.11g, touch screen and a SDIO slot.

#### Wireless network compatibility

- Wi-fi (802.11b/g)
- Cellular
- Satellite

#### Sectors

- Oil & Gas
- Public safety
- Health/Telehealth
- Aeronautics
- Chemical Plants
- Industrial
- Energy
- Engineering and construction
- Architecture
- Project and operations management

# FRONTLINE

## COMMUNICATOR

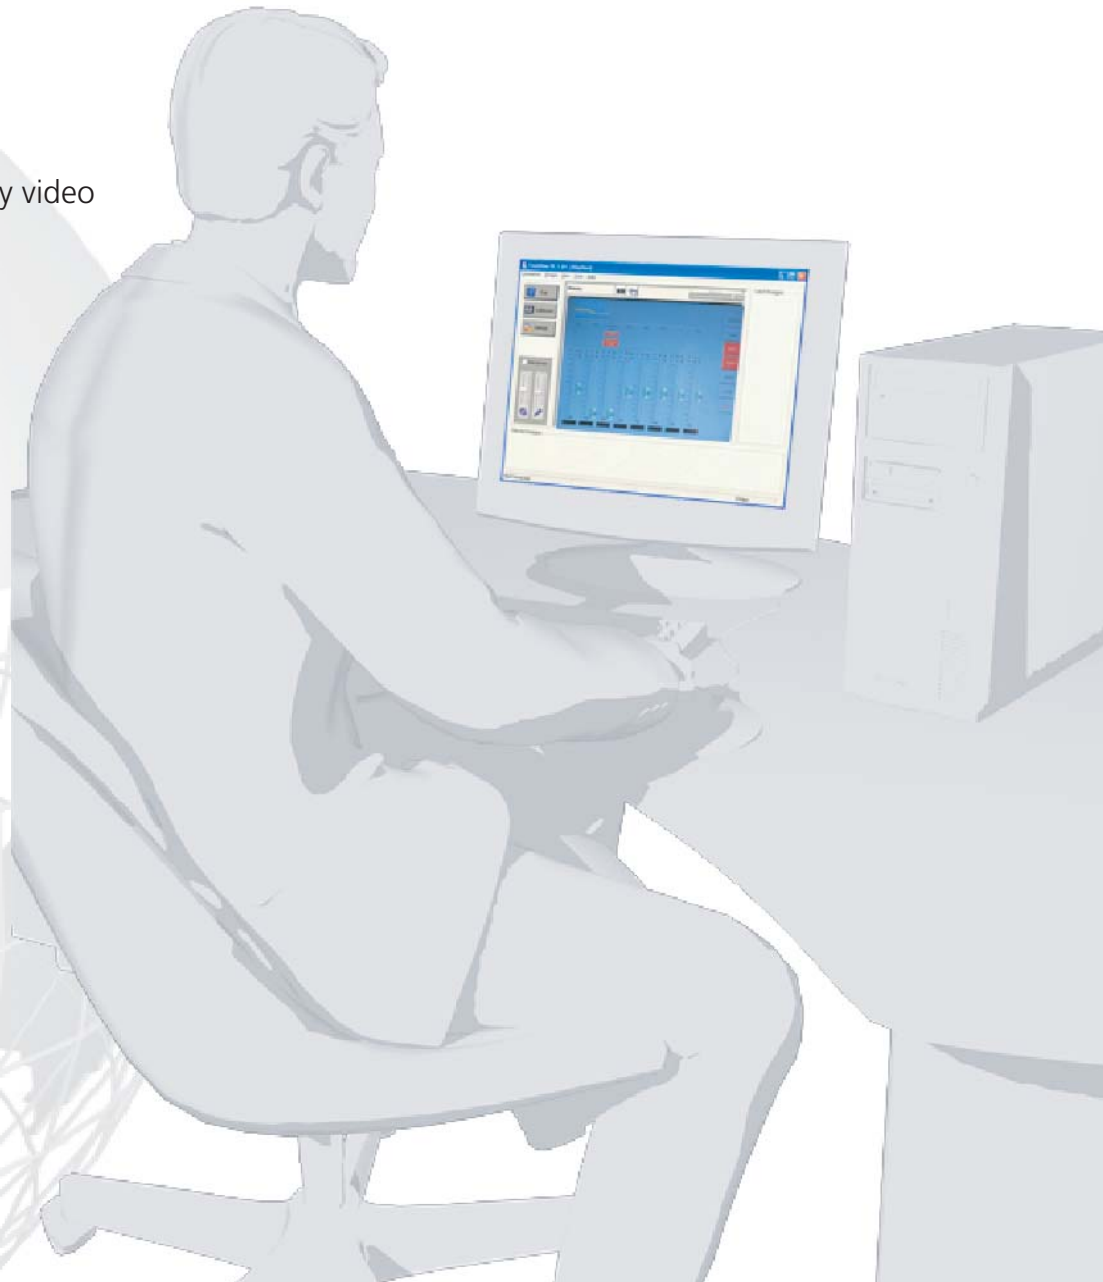

With the Frontline Communicator, you can considerably reduce response time, increase your productivity and improve your customer service.

### Main Features

- Full duplex audio and one-way video
- IP Communication
- Live transmission on high and low bandwidth
- Recording and snapshot capabilities

### Applications

- Technical remote support
- Telemaintenance
- Remote collaboration
- Distance training
- Transmission of critical information
- Investigation and evidence recording

### Communication software solution

This license-free proprietary software is easy to install and easy to use. It allows a person using a PC to have a two-way conversation with the Frontline Communicator user. With this software, you can also receive colour video images instantaneously and capture still snapshots for future use.

## About us

Established in 1997, AudiSoft Technologies develops, manufactures and markets high-end audio-video communication systems. Lightweight and portable, our solutions provide complete mobility to its users. AudiSoft Technologies has been awarded many prestigious prizes internationally for innovation, design and quality thus recognizing the company's breakthrough technologies and achievements. Our products are available worldwide through our network of authorized distributors, resellers and VARs. For more information, call us or visit our website at [www.audisoft.net](http://www.audisoft.net)

### Proud partners of:

### Other products:

#### AudiSee

The AudiSee is the world's first audiovisual FM system for oral-deaf or hard-of-hearing students. With the AudiSee, students have instant access to all the information given by the teacher.

#### Frontline Gateway

Frontline Gateway is the One-to-Many hardware solution (blade) enabling multiple users to interact amongst each other, no matter their IP network and location around the world. Combining state-of-the-art technology and performance, this solution allows real-time audio, video, data communication between a Frontline Communicator User and multiple other persons simultaneously.

#### Frontline Central

Frontline Central is a powerful software addition to the Frontline Communicator. It enables one central computer to manage communications with many Frontline Communicator units operating under different bandwidth conditions. Using Frontline Central, you may interact in real-time with a team of Frontline Communicator users dispersed throughout a plant or even anywhere in the world.
