

FRONTLINE

COMMUNICATOR BGAN solution

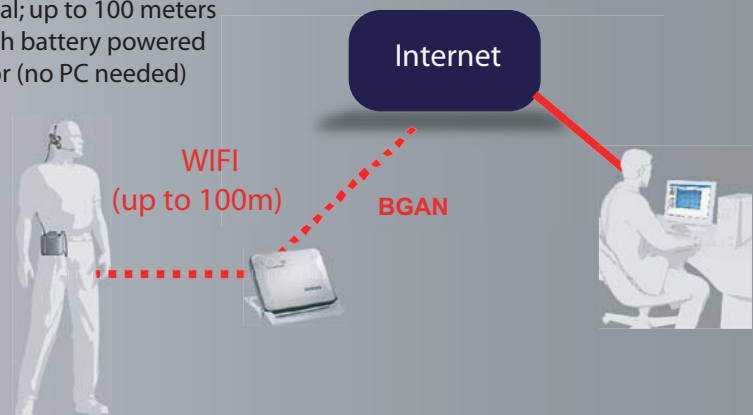

DESCRIPTION

Combining two breakthrough technologies! Mobile field workers can now get **real-time** assistance and guidance from a remote expert ... no matter their location or for how long... and when they need it the most.

Frontline Communicator connects wirelessly (WiFi) to the BGAN terminal, then being routed to the satellite to finally reach the remote expert PC over the Internet.

KEY FEATURES

- Distance range between Frontline and BGAN terminal; up to 100 meters
- Frontline Communicator and BGAN terminal are both battery powered
- BGAN terminal control from Frontline Communicator (no PC needed)
- Secured communication (AES-128)
- One way Video and Two-way Audio
- Quick Mute Video to save bandwidth
- File transfer (Word, Excel, PDF, JPEG, ...)
- Video and snapshots recordings on SD card
- Store and forward of video clips and images
- Pre-defined profiles for BGAN
- Fully optimized for BGAN
- Multipoint support
- H.323 support
