

AUDISOFT TECHNOLOGIES' FRONTLINE COMMUNICATOR NOW H.323 COMPATIBLE!

FRONTLINE COMMUNICATOR USERS CAN NOW CONNECT WITH EXPERTS VIA H.323 VIDEOCONFERENCING SYSTEMS

Anaheim, California, October 15, 2007 – AudiSoft Technologies, innovator and industry-leader in IP-based wearable & mobile audio/video/data communication devices, announces H.323 compatibility for its Frontline Communicator solution.

"H.323 Compatibility is a major achievement for AudiSoft Technologies" said Louis Duchesne, Sales and Marketing Director. "The Frontline Communicator now plays an important role in expanding collaboration to new levels within the organization where mobility is needed such as manufacturing, public safety, public works and remote applications".

The Frontline Communicator is a wireless and wearable audio/video/data communication device allowing technicians and field agents to connect with experts located anywhere in the world for guidance, instructions, and diagnostics. Hands-free, the Frontline Communicator solution boosts efficiency and productivity, by allowing faster situation assessment and decision making in time of crisis, helps to prevent and reduce downtimes and gives instant access to key remote resources.

"AudiSoft Technologies was committed to making the Frontline Communicator H.323 Compatible" said Marie Lapalme, CEO at AudiSoft Technologies. "It is an important milestone for our company and without a doubt a success factor in our Arena Partnership with Polycom".

AudiSoft Technologies is demonstrating the H.323 Compatible Frontline Communicator at the Polycom User Group (PUG) Conference in Anaheim, October 14-17, 2007.

About AudiSoft Technologies

AudiSoft Technologies develops and markets the Frontline Communicator - *the world's first true IP mobile, wireless and wearable audio/video/data communication equipment* to many industries worldwide: government, military, medical, media, oil and gas and mining industries. Frontline Communicator provides to the operator freedom of movement and real-time AVD communication for many applications: real-time assistance, tele-training, tele-mechanical assistance, remote support and more. Frontline Communicator also offers three communication path ways options for users: one to one, one to many (multicast) and many to one.
