

FOR IMMEDIATE RELEASE

## AUDISOFT TECHNOLOGIES<sup>®</sup> ANNOUNCES A PARTNERSHIP WITH POLYCOM<sup>®</sup>

**Longueuil, Québec – April 27, 2007** – AudiSoft Technologies is pleased to announce that it has joined the Polycom ARENA partner program. Polycom, Inc. [NASDAQ: PLCM] is the worldwide leader in unified collaborative communications (UCC). AudiSoft Technologies designs and manufactures small, wearable and wireless video communication solutions enabling real-time audio/video/data transmission. This Agreement underlines the synergies between each company's products and their common corporate values.

Mrs. Marie Lapalme, President & CEO of AudiSoft Technologies said that this collaboration has great potential and thinks the outcomes of the ARENA program will surpass initial expectations. For instance, the company has accelerated the integration of H.323 standards into its Frontline solutions so communication can easily be established with Polycom products. AudiSoft Technologies will also benefit from the promotion and marketing of its products to Polycom's clients, resellers and distributors.

AudiSoft Technologies' flagship product, the Frontline Communicator, is a light, rugged, ergonomic and hands-free solution that works on almost any type of networks (WiFi – 802.11b/g, satellite, 3G, Mesh, WAN, wired, etc.). The basic Frontline Communicator system allows point-to-point videocommunication. When used in combination with Frontline Central or Frontline Gateway, the Frontline Communicator becomes a powerful multipoint videocommunication system. It can dramatically change the efficiency, the performance and the effectiveness of organizations in any complex operations or even in its daily activities.

By enabling wireless mobile video communication in areas where traditional video communication is not available, the Frontline Communicator allows users to be right in the center of the action and lets them share with colleagues or experts, in real time, color video images of what they are looking at. This video communication solution has many applications: project management, home care, support and services activities, etc. For instance, it will be appealing for first responders, the health sector, journalism, exploration (mining, forest, oil & gas, etc.), public safety, or large scale project management.

AudiSoft Technologies and Polycom will present the Frontline Communicator solution at InfoComm 2007 in Anaheim, California.

AudiSoft Technologies' products are sold internationally through a network of certified channel partners. To know more about the Frontline Communicator solution, visit AudiSoft Technologies' website at [www.audisoft.net](http://www.audisoft.net) or contact an authorized partner of the Frontline Communicator.
