

FOR IMMEDIATE RELEASE

AUDISOFT TECHNOLOGIES, ACCREDITED BY SWE-DISH FOR THE USE OF FRONTLINE COMMUNICATOR WITH THE SWE-DISH SUITCASE CLASS OF TERMINALS.

Longueuil, Quebec, February 6, 2009– AudiSoft Technologies, innovator and industry-leader in IP-based wireless and mobile videoconferencing systems today announced it has received the SWE-DISH Certification for its Frontline Communicator with the use of SWE-DISH Suitcase class of terminals.

"Certifications and accreditations from technology partners serving the same global markets are the best mechanisms we have to standardize levels of reliability and compatibility," said Marie Lapalme, CEO of AudiSoft. "SWE-DISH certification is a good example of different manufacturers working together to ensure that their solutions work and integrate seamlessly for all clients, with the guarantee to transmit highly-sensitive information with efficiency and security. With this certification, both companies can now provide worldwide client a complete mobile turn-key solution to meet their operational responsibilities

About AudiSoft Technologies

AudiSoft Technologies develops and markets the Frontline Communicator - the world's first IP mobile, wireless and wearable videoconferencing equipment, to the land mobile, maritime, government, public safety, military, medical, media, oil and gas and mining industries. Frontline Communicator provides freedom of movement and real-time AVD communication to the operator, for a range of sectors and applications such as training, remote assistance and more. With BGAN added to the mix, it offers a powerful system for inspection and monitoring, no matter how remote the location. For more information, visit www.audisoft.net.

About SWE-DISH Satellite Systems AB

SWE-DISH Satellite Systems AB, headquartered in Stockholm, Sweden, is a world-leading supplier of mobile satellite communications equipment and related services for broadband applications. The company supplies major broadcasters, armed forces and disaster relief organizations, amongst others, with compact and quick-to-air satellite terminals for live transmission of video, data, Internet and voice content from anywhere in the world. Its customer base includes broadcasters such as CNN and BBC, disaster relief organizations and military organizations such as the United Nations, NATO, Danish Defense, the Swedish Defense Materiel Administration (FMV) and the U.S. Department of Defense. SWE-DISH was established 1994. For more information, visit www.swe-dish.com.

About DataPath, Inc.

DataPath® is a global leader in creating satellite-based network solutions that solve customers' toughest communications challenges. It specializes in enabling highly complex, video-intensive communications networks that are critical to the operations of military, civilian government and commercial organizations. Even in the most urgent time frames and extreme conditions, DataPath establishes and maintains communications anywhere and delivers total network control through its communications solutions, MaxView® network control software and comprehensive services. DataPath is headquartered in Duluth, Ga., U.S.A. and operates via more than two dozen offices and distributor locations around the world. For more information, visit www.datapath.com.
